

Name: _____ Pd. _____ Date: _____

Comparing Mitosis & Meiosis

	MITOSIS	MEIOSIS
# parent cells		
Type of reproduction		
# of cell divisions		
# daughter cells produced		
# chromosomes in daughter cells compared to parent cell		
Haploid or diploid number produced in daughter cells		
Genetic similarity between parent and daughter cells		
Importance in the animal body		

Directions: A parent cell contains 6 chromosomes. Write the number of chromosomes in both daughter cells.

Directions: A parent cell contains 6 chromosomes. Write the number of chromosomes after meiosis I and II in daughter cells.
